Adviser: **Gary Dave Escoton, MAEd**

The main purpose of the study seek to look for the relationship between factors affecting working student's time management and academic performance of education students in Davao del Sur College particularly the third-year working students. The study was conducted among 37 working students of Davao del Sur for the academic year 2022-2023. A self-made research instrument was utilized and a pilot study was conducted and documented through Google form. The pilot study helps the researcher to assess the efficacy of research instruments for use in quantitative research. Using correlation tools and descriptive statistics, the following findings were obtained in the study.

Results of the study revealed that there is one among the factors that we reject our null hypothesis. This means that there is significant relationship between factors affecting working student's time management and academic performance of education students. The degree of relationship between factor's affecting working student's time management

and academic performance is obtained 0.004 it has a low positive correlation.
